WHY REFER TO THE THE RETINA CLINIC – LONDON OPHTHALMIC INSTITUTE

**Exceptional care for your patients.
Seamless partnership for you.**

At The Retina Clinic – London Ophthalmic Institute, we raise the standards of specialist eye care. For patients, this means rapid access to world-leading diagnostics and treatment.

For you, it means straightforward referrals, shared management, and confidence that continuity is maintained. An internationally recognised team, led by Professor Paulo-Eduardo Stanga, our clinic is a fully self-contained private ophthalmic institute - equipped with its own advanced diagnostic suite and onsite operating theatre.

What sets us apart?

- 1. Rapid Access:** Patients bypass NHS and insurance delays, with potential same-day consultation, diagnosis, and treatment in urgent cases, including emergency surgery for retinal detachment.
- 2. Continuity of Care:** Our bi-directional referral system keeps you involved every step of the way avoiding the complexity and risks associated of passing patients from provider to provider.

3. Unmatched Diagnostics: AI-driven imaging, ultrawidefield OCT & OCTA, microperimetry, ERC, and adaptive optics—rarely available outside university hospitals.

4. Onsite Surgery: Retinal detachment repair, proliferative diabetic retinopathy, macular hole closure, epiretinal membrane peel, floater removal, and bespoke cataract surgery with premium IOL- all surgeries are performed onsite and never outsourced back to the NHS.

5. Medical Retina Expertise: Advanced care for AMD, diabetic eye disease, vein occlusions, drug toxicity, complex macular disease and inherited retinal dystrophies (IRD).

6. Specialist Services: The UK's only private, integrated Diabetic Eye Screening, Uveitis and Genetic Retinal Disease programmes, with access to gene therapy and clinical trials.

7. Beyond Retina: Precision glaucoma monitoring and treatment with next-generation imaging, and cataract surgery with premium or monofocal IOLs - free of NHS restrictions and tailored to patient preference.

BENEFITS FOR YOUR PATIENTS

Faster Access. Earlier Answers. Tailored Care.

Patients avoid NHS queues & referrals and insurance hurdles, receiving immediate access to world-class expertise. Our specialist consultations (£650-£950) include a full suite of advanced diagnostics, with most patients receiving both a clear diagnosis and a personalised management plan at their very first visit.

Continuity and Co-Management.

Our two-way referral pathway ensures you remain integral to the patient's journey. We actively value your clinical insights, share all updates promptly, and where follow-up care or local testing is appropriate, we remunerate your contribution to ensure seamless shared care.

World-Leading Diagnostics at Harley Street.

Unlike many "consulting-only" providers, we are the UK's first private and fully self-contained retina clinic to use AI in routine practice - provide unrivalled diagnostics. Our multimodal testing includes; ultrawidefield RGB multi wavelength imaging, ultra widefield and navigated peripheral OCT, high-resolution OCT, single scan ultra widefield OCT angiography, ultra widefield fluorescein and indocyanine angiography, microperimetry, ERG, adaptive optics, and more. Unlike most, we never outsource patients to NHS hospitals for investigations - everything is delivered onsite for speed, comfort, and continuity.

Onsite Operating Theatre.

Our dedicated surgical theatre allows urgent same-day surgery where needed. We offer the full spectrum of advanced vitreoretinal and cataract procedures - retinal detachment repair, proliferative retinopathy, macular hole closure, floater removal, and bespoke cataract surgery with premium intraocular lenses - all performed under one roof for coordinated, efficient care.

COMPREHENSIVE EXPERTISE ACROSS RETINA AND OPHTHALMOLOGY

Surgical Retina: Vitrectomy for retinal detachment, macular hole, epiretinal membrane, floaters, and trauma; advanced cataract surgery with premium IOLs; immediate access for urgent surgical cases.

Medical Retina: Dry and Wet AMD, diabetic eye disease, retinal vein occlusion, drug-toxicity monitoring, inherited retinal diseases (IRD) and complex macular conditions, alongside co-managed glaucoma care.

Specialist Services:

Uveitis: The UK's only fully self-contained, consultant-led private service for ocular inflammation.

Genetic Retinal Disease: Comprehensive testing with access to on-site gene therapy clinical trials for Stargardt, RP, Usher, and others.

Posterior Vitreous Detachment (PVD): Urgent assessments including navigated ultrawidefield imaging, peripheral OCT, and indirect ophthalmoscopy with scleral indentation - the gold-standard technique rarely performed in NHS A&E or private clinics, yet the only way to fully examine the retina up to its edge (ora serrata).

Gateway to Groundbreaking Treatments.

Our patients may access global clinical trials for conditions including Dry and Wet AMD, diabetic maculopathy, floaters, and inherited retinal diseases - offering opportunities to benefit from tomorrow's therapies today.

REFERRING BENEFITS

SIMPLE PATHWAY. STREAMLINED ACCESS.

Refer through our secure portal, upload case details, and follow progress in real time.

SHARED CARE.

We collaborate—never replace. You are kept fully updated and involved in decisions. Where appropriate, we support follow-up care and local testing.

EXTEND YOUR CLINICAL OFFERING.

Provide patients with access to world-leading imaging, advanced surgical techniques, and diagnostics for complex conditions and access to international and approved clinical trials outside of an NHS facility.

HARLEY STREET AFFILIATION.

Align with a global leader in medical and surgical retina, gene therapy, and AI-enhanced diagnostics.

NO INTERMEDIARIES.

Work directly with our consultants, ensuring rapid, clear, and clinically aligned communication.

EXCLUSIVE CLINICAL TRIAL ACCESS.

Offer patients therapies not yet available elsewhere in private practice, while remaining their trusted primary clinician.

Partner with The Retina Clinic – London Ophthalmic Institute. Delivering care that reflects your standards—and your patients' expectations.

Referring to us elevates your practice. You gain access to elite care, surgical excellence, and pioneering treatments. Patients receive rapid and early diagnosis, advanced therapies, and compassionate support - while you remain at the heart of their care.
